## ML - MARINE SPOTLIGHTS

**With all the superior features of the SL series the ML spotlights are specifically designed for boating enthusiasts and use in extreme marine environments.**

**The intense focusable beam penetrates the inky blackness of night like no other on the market!**

All 3 HAND HELD SL model spotlights are now available with specialised modifications to help prevent moisture getting into the light when used on boats or marine environments.

Due to its superior light output and efficiency this light is perfect for night time navigation, identifying landmarks and negotiating difficult waters and hazards. It is corrosion resistant and unaffected by thermal shock making these lights ideal for these extreme environmental conditions that frequently see lesser lights cease operation.

Considering the potential danger of equipment failure when out on the water, it only makes sense for you and other's safety to choose LIGHTFORCE ML spotlights as your standard equipment.

ML240 IS IDEAL FOR HAZARDOUS NIGHT TIME NAVIGATION

ALL 3 SIZES ARE AVAILABLE IN REMOTE MOUNT CONFIGURATION
